Reference No. E-5

State Idaho

Date May 22, 1950

1. Name of Prospect Mica Dome and Glass Knobs District Garden Valley

Approx. Location Garden Valley Sec. 32 Twp. 6 N. R. 4 E. Boise

Samples submitted by Personal request by Mr. Wallingford, Pocatello, on behalf of Glass and Dosch property in same area.

Address

Owner of claim, mine or land Mica Dome owned by W. C. Glass, Garden Valley, and under lease to E. D. VanDissel and W. A. Kapp.

Minerals Cyote Group staked by E. D. VanDissel and W. A. Kapp, Garden Valley, Idaho

Examined by R. E. Thurlow Date of Exam. May 24, 1950

No. of samples collected None Type

List of available maps List of previous reports

Forest Service Map None

2. Description of Examination - (amount detail radiometric traversing, detail geology, mapping, etc.)

Radiometric reconnaissance of several trenches and cuts, and one adit.

Sketch map (with Sample Loc. Data)

Geology -

3. Type of Deposit -
Pegmatite dikes and irregular bodies.

4. Geologic Environment - (Wall rock, etc.)

Granitic rock of Idaho batholith.

5. Mineralogic Associations -

Qtz, feldspar, mica; traces of columbite and samarskite.

[redacted]

6. History of Prospect -
Mica Dome reportedly once worked for mica but evidently on a very small way. Recent bulldozer cuts at Cyote group exposed dikes from 2' to 6' wide, some with good grade feldspar.
