4. ADDITIONAL INFORMATION ON MINERALOGY, RADIOACTIVITY, GEOLOGY, MINING, ETC.

Exploration of the Independence group of claims is being conducted from the 3650 level of the Morning Mine. This project will extend considerably further to the east than other levels of the mine, and will consequently penetrate previously unexplored ground. Approximately 3500 feet of development has already been accomplished, but a Scintillometer traverse revealed no anomalies. Background was uniform throughout, ranging from 30-40 counts per second on a Halross Model 939 Scintillometer.
