Purpose - To make samples of rock groups for each table.

- 1) During the field trip I was able to find samples of quartzite, granite, and metamorphic rocks of the belt.
- 2) When I get back home I will add some basalts from my area.
- 3) I will build some boxes or buy some tackle boxes so I will have a ~~set~~ set for each table.
- 4) I will continue to add to the set until I complete them.
