**TEACHING NATURAL HAZARDS SURVEY (Distributed at 2007 Field Workshop)**

Please help us assess the health of natural hazard teaching in Idaho schools with this short survey.

1. Which grade level(s) do you teach (check as many as apply)?

1 Primary    1 Upper Elementary    13 Middle School    0 High School

2. Which of the following natural hazards do you incorporate into your curriculum (check as many as apply):

12      Earthquakes

9        Landslides

7        Wildfires

10      Floods

12      Volcanic eruptions

10      Severe storms (tornadoes, hurricanes, etc.)

1        Other (specify) pollution, air quality, water quality, environment

3. In the 2006-2007 school year, did you include discussion of natural hazards in your school emergency drills? 9 YES    2 NO

4. What barriers do you have to including natural hazards into your curriculum (check all that apply):

7        Not listed in the state science standards

3        Not listed in the federal science standards

4        District curriculum limitations

1        Lack the necessary academic background/training to implement

2        Lack appropriate teaching materials

1        Other (please specify) Time

8        No barriers to teaching natural hazards at my school

5. Where would you rank the importance of teaching hazards in the classroom? (Circle the best response)

Low

High

1                    2                    3                    4                    5

$$1 = 0$$

$$2 = 1$$

$$3 = 0$$

$$4 = 7$$

$$5 = 7$$
