

The geologic map data from this publication have been compiled at 1:24,000 scale as part of the GIS data set for the Geologic Map of the Idaho Part of the Grangeville 30 x 60 Minute Quadrangle, and Adjoining Areas of Washington and Oregon (GM-50).

These data are the most complete, most up-to-date, and the best source of geologic spatial information for this publication.

Click on the "GIS Data" link in the Download Center to acquire these data. It is a good idea to read the Readme file and Metadata included with this data set.
